Who needs Accommodate Pro?

YOU do! Federal law mandates that all schools must provide for students with attention deficit disorder, physical or mental impairments, and qualifying medical conditions.

Accommodate Pro is a software program that can:

- * Fulfill Section 504 mandated requirements.
- * Document learning and behavior problems.
- * Create intervention plans with accommodations.
- * Track and review student progress.
- * Communicate intervention plans to teachers.
- * Prepare due process letters for parents.
- * Save time by automatically entering student data in all forms.
- * Plan for **at risk** students who fail to show adequate yearly progress.

Accommodate Pro is *comprehensive* and *simple* to use. The complete process for developing a student plan and all necessary forms is right at your fingertips. Enter student data once, and it is transferred to every page where you need it. **Fast** and **easy**.

Accommodate Pro provides a blueprint for developing your own 504 process at the building or district level and includes important definition and policy pages, which can be printed.

Accommodate Pro is a product of **Data Impact Software, LLC**

\$129.00 per user for Mac or PC computers
Reduced prices for quantity orders.
