Service Logs

IEP Express is a computer program for special education personnel who are responsible for identifying students with IDEIA disabilities, and developing and implementing their educational plans.

Do you need to-

- determine a student's eligibility for special education?
- generate goals and objectives for a student?
- write a Special Education Teacher's Report?
- print forms for the Individual Education Planning Team?
- report student progress?
- create a behavior intervention plan?
- communicate meeting information to parents?
- eliminate redundant paperwork?
- prepare progress reports and document service?

IEP Express does all of the above, and much more.

IEP Express is an essential tool that helps Special Education staff efficiently fulfill all the paperwork requirements for their IEP's.

New! IEP Express 7.0 produces goal/objectives and progress reports for IEP meetings and service logs using a data bank comprised of the Michigan English Language Arts (ELA) and Math Grade Level Content Expectations (GLCEs), MI-ACCESS ELA and Math GLCEs, and the non-academic portion of the RESA bank of objectives. Special ed teachers now have an opportunity to produce objectives that align with the general education curriculum. Access to the general ed curriculum is mandated by IDEIA 2004.

IEP Express is a product of **Data Impact Software, LLC**

\$149.00 per user for Mac or PC computers

Reduced prices for quantity orders.
